

Usability Evaluation: Visualization Dashboard

This brief questionnaire aims to evaluate the usability and clinical integration of the new interactive Dashboard for 3D coronary stenosis visualization and quantification. Your responses are completely anonymous and will be used for a Bachelor's Thesis in Mathematical Engineering in Data Science.

1. Please rate your agreement with the following statements regarding the Coronary Explorer Dashboard (1=Strongly Disagree, 5=Strongly Agree):

Marqueu només un oval per fila.

	1 (Strongly Disagree)	2	3 (Neutral)	4	5 (Strongly Agree)
I think that I would like to use this coronary viewer frequently in clinical practice.	☐	☐	☐	☐	☐
I found the system unnecessarily complex.	☐	☐	☐	☐	☐
I thought the Dashboard was easy to use and intuitive.	☐	☐	☐	☐	☐
I think that I would need the support of a technical person to be able to use this system autonomously.	☐	☐	☐	☐	☐
I found the various functions in this viewer (interactive 3D meshes, profile plots, clinical metrics) were well	☐	☐	☐	☐	☐

integrated.
